Subject: Request for Extension of Monitoring and Reporting Program No. CI-9310
Individual Waste Discharge Requirements (WDR) Order No. R4-2007-040
The Boeing Company
Former C-6 Facility, 19503 South Normandie Avenue, Los Angeles, California
File No. 95-036; SLIC No. 410; Site ID No. 1846000

Dear Ms. Townsend:

Camp Dresser & McKee Inc. (CDM), on behalf of The Boeing Company (formerly Boeing Corporate Real Estate), is hereby submitting this request for extending the above-referenced Monitoring and Reporting Program (MRP, dated August 22, 2008) associated with the Individual WDR Order No. R4-2007-040 to the California Regional Water Quality Control Board, Los Angeles Region (LARWQCB) for the Building 2 area of the Former C-6 Facility in Los Angeles, California (Site).

The purpose of this request is to allow for continued WDR monitoring and tracking of biodegradation changes associated with the Building 2 area slug injections conducted in 2008. The last WDR monitoring event for Building 2 area under the current MRP was completed on March 2010 (last semi-annual event of year 2) with the Final WDR report planned for submittal by July 30, 2010. This MRP extension request proposes to continue monitoring and reporting of the Building 2 area WDR monitoring wells on an annual basis for a period of one (1) year. The annual event under this proposed extension request will be conducted in March 2011 with the associated monitoring/addendum to final WDR report submitted by July 30, 2011. The number of Building 2 wells to be monitored during each event will remain unchanged (Group B, C, and D wells as specified in current MRP). The required constituents to be analyzed for each group of wells will be same as those specified for events after Year 1 in the current MRP. No other changes are proposed to the MRP.
